

GoDaddy Directions for buying a domain. As of 03/25/2014

Do an Internet Search for GoDaddy coupons and write down a coupon code.

A. Call GoDaddy.com at: 480-505-8877 (<http://www.godaddy.com/>)

B. There may be a little pause after the option for Spanish or another option. Then select the option to Press 2 "Purchase or speak with someone about your business goals"
Press 1 "Build a personal Website"

There was a 9 minute wait this evening when I called.

C. Tell the person who answers that you want the BEST deal he/she can give you for the following:

1. To purchase yourDomain.com for 1 year (today their web site reads .Com for \$9.99)
(2 years will get you better terms, but will cost you more up front)
2. To purchase 1 year ECONOMY hosting (today their web site shows hosting for \$4.99 a month = \$60 for year)
(2 years will get you better terms, but will cost you more up front)
3. To obtain a free email address with your purchase
4. Tell him you will be building the Website from scratch - you do NOT want a template (templates limit what you can do)

AFTER you get a quote give him/her the GoDaddy Coupon Code number.

According to their website the total price for 1 year should be \$70, with a 20% discount from the coupon.

Ask him to set a GoDaddy user name for you, such as SamSmith and help you with a user password.

Then ask him to help you set an FTP ID and password.

Write the following down as you are on the phone:

Your 7 digit GoDaddy Account number ID:

(AND If you set it - Your GoDaddy UserName - such as SamSmith):

Your GoDaddy Account Password:

Your 4 digit GoDaddy support PIN number:

Your GoDaddy FTP UserName

Your GoDaddy FTP password:
