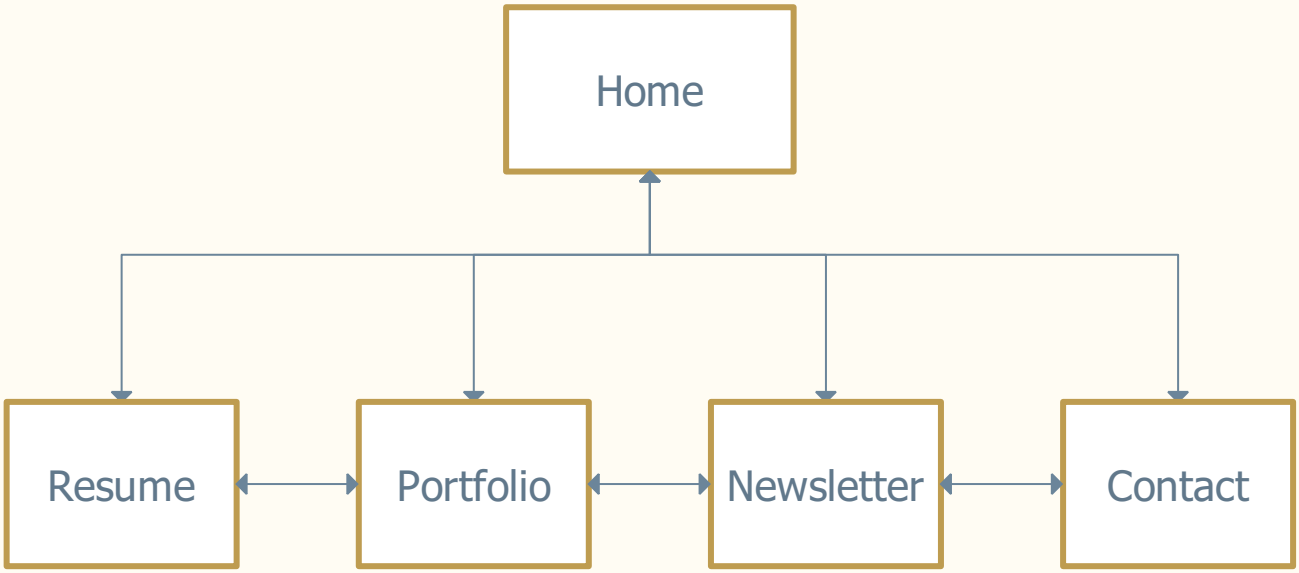
Story Board
John Osmond Resume Site

The Story Board for this site is simple.
Through the navigation bar or the navigation links in the footer
every page is linked to every other page.



Design Guidelines

The following guidelines will be followed while designing the site for John Osmond Resume Site

1. Basic layout:
    a. As shown in the mockup, not all pages will have the exact same layout, but the overall layout of the site will be consistent.
    b. Not all pages will have a side bar. Some will take up the full width of the page.
2. Background texture:
    a. The background texture will be behind the header, main content, sidebar, and footer on each page.
    b. The selection may change, but the texture should be soft, and the color should be light and simple. No sharp lines, no busy pattern, and the color should be a light gray or soft earth tone.
3. Consistent header:
    a. The header will be consistent on every page except the profile page.
    b. On all pages, the header will consist of a simple logo, the text “John Osmond” along with subtext “Personal Resume Site”, and a navigation bar.
    c. All pages except the profile page will have a header image below the navigation bar.
    d. As stated, the header will contain the primary navigation bar. If sub-level pages are added in the future, links to those pages will be added as drop-down menus in the header.
4. Consistent footer:
    a. The footer will be consistent on every page.
    b. The footer will have a text-based navigation bar. If sub-level pages are added in the future, links to those pages will **not** be included in the footer navigation.
5. Consistent navigation:
    a. The navigation bar in the header and the navigation links in the footer will be identical on every page – no exceptions.
6. Sidebar (Aside) content:
    a. All pages except the profile page will have a side bar with content that is related to the site overall as well as content that may apply to the specific page.
7. Fonts:
    a. Font choices will be consistent across the entire site. While specific fonts have not yet been selected, heading fonts will be sans-serif and content paragraph fonts will be serif. When selecting the paragraph font, the serifs will be subtle (not Times New Roman).
8. Colors:
    a. While the color scheme has not yet been selected, there will be a primary color, a secondary color, a deliberate use of black, white, and grays.

9. Text sizes:
    a. H1: 28px; H2: 24px; H3: 20px; H4: 18px; H5: 16px; H6: 14px.
    b. Paragraphs: 12 to 14px.
    c. Sizes for mobile and tablets may be adjusted as we test for those devices.
10. Information hierarchy:
    a. The home page will serve as an “About Me” page alleviating the need for a page with that title.
    b. After that all pages will be specific to the title and purpose of the page.
